

Removable Nozzle

The Martin® Removable Nozzle is a new idea in air cannon maintenance, removable high-temperature nozzle, eliminates the time, hassle and expense of standard nozzle replacement.

Fast Replacement

Using a permanent-mount mating collar, nozzles are removed and replaced during refractory change-out without cannon removal.

Save Man-Hours

Eliminate the need for cutting, welding, remounting, or refitting, enabling your maintenance resources to go farther.

Shorter Shutdowns

Reduces the length of shutdowns through faster, easier and more accurate nozzle maintenance and replacement.

Removable Nozzles enable consistent alignment of the blast pattern by eliminating the cut-and-replace process of traditional nozzles.

Size	Part Number
Nozzle Assembly	38385
Replacement Nozzle	38387
